Mission

I am seeking a career in the Android/Management area that will take advantage of my creative problem solving, and out of the box skills. I have grown and learned so much from past teams and adventures which I am grateful for. However, there is still so much to learn, experience, and grow. I am looking for new and challenging problems to solve. Also, I am looking forward to the amazing challenges, adventures, and struggles that lie ahead. At the end of the day it's the journey not that destination.

Technical Skills

Mobile Development - Android (Kotlin, Jetpack Compose, & Java)

Education

University of Wisconsin-Parkside - B.S in Computer Science & Applied Health Science-Physical Therapy

Experience
